High-impact target journals at School IE

The School of Industrial Engineering has compiled a list of high-quality, focal journals that represent the scientific area in which the School publishes. These high-impact target journals have been selected based on their recognition in the field (for example in internationally established benchmark lists), their bibliometric performance, and their relevance for the School's content-wise research strategy. The list is shown below in alphabetic order. Note that this is not an exhaustive list of the School's scientific output; more specific journals are targeted when required.

- Business & Information Systems Engineering
- Decision Support Systems
- European Journal of Work and Organizational Psychology
- IEEE Transactions on Fuzzy Systems
- IEEE Transactions on Knowledge and Data Engineering
- Information Sciences
- Information Systems
- Journal of Applied Psychology
- Journal of Business Venturing
- Journal of Management Studies
- Journal of Marketing
- Journal of Occupational Health Psychology
- Journal of Operations Management
- Journal of Occupational and Organizational Psychology
- Journal of Organizational Behavior
- Journal of the Academy of Marketing Science
