Smart Grids in India

A NWO-MVI funded project
Project no. 313-99-307

Dr Ankit Kumar
School of Innovation Sciences
What is a sociotechnical smart grid?

Smartness of different elements – technical, social, financial & governmental

Different types of smart grids
- project visits
- interviewing project heads
- 5 site visits in 4 states – 3 rural, 1 urban
- 6 interviews
- Collecting more data/literature on the projects and sector
Example

smart meters – critical social, technical, financial and governmental instrument

breakdown logging – language / literacy neutral
a more reliable grid, financially – data can be live tracked by stakeholders

trust and reliability – better objects for investing
