FAQ’s – selection 4 Bachelor’s programs 2018-2019 - September 2017

What is (decentralized) selection?

This is where an educational institution (in this case TU/e) has put into effect a limited capacity (numerus fixus), which means only a limited number of available places. The enrollment process is therefore different from that of normal study programs where there is no selection. Selection and the awarding of ranking numbers determine who is offered a place for the study program. It is essential for you to enroll for a decentralized selection study program via Studielink by 15 January at the latest.

For which Bachelor’s programs is TU/e introducing a selection?

It concerns the following:

• Biomedical Engineering/Medical Sciences and Engineering
• Computer Science & Engineering
• Industrial Design
• Industrial Engineering (Technische Bedrijfskunde)

For the time being no other TU/e studies are subject to selection.

When is TU/e introducing selection?

Selection is being introduced for the first time in the academic year 2018-2019.

Why is TU/e introducing selection?

In academic year 2018-2019 we have a maximum number of student places for these four studies due to the limit there is in terms of the number of students we can offer good education. TU/e believes in small-scale education with plenty of contact between teachers and students. But given the rapid growth of recent years, the limit has now been reached.

If interest exceeds the maximum number of students, then we will apply a selection procedure whereby we determine who may and may not follow these studies. The selection is based on the engineers that society and industry need, the engineering graduates we aim to educate.

What type of engineering graduate is TU/e seeking?

Today’s engineer isn’t just a pretty face or a boffin. He or she has to be able to collaborate well, communicate and think creatively, for example, as well as be enterprising and look beyond the
horizon. The engineer of today seeks technical solutions for the problems that today’s society confronts. Like how we can produce clean energy, heal unhealthy or damaged human tissue or promote sustainable mobility.

This does not mean that every engineer has to be good at everything. If you specialize in a specific field, you can still be a versatile engineer. It’s about making use of the talent and capacities you have: from specialist to manager, from designer to entrepreneur. Engineers working in industry, in their own companies, for the government and in the scientific community.

Selection is a way of finding students who can become the engineers of the future. And, of course, you can also decide whether we are the right university for you.

**What is the maximum number of students that can be enrolled per study program?**

These are the maxima:

- Biomedical Engineering/Medical Sciences and Engineering: 225
- Computer Science & Engineering: 250
- Industrial Design: 120
- Industrial Engineering: 250

An illustration: in 2016 nearly 250 students began a Biomedical Engineering/Medical Sciences and Engineering study, some 270 Computer Science & Engineering, around 180 Industrial Design, and 200 Industrial Engineering.

95% of the maximum number of students per study program will be selected and the remaining 5% reserved for exceptional cases. See the TU/e regulations.
How is the procedure organized?

The following dates are key:

<table>
<thead>
<tr>
<th>Date</th>
<th>Event</th>
</tr>
</thead>
<tbody>
<tr>
<td>1 October 2017</td>
<td>Registration for the selection Bachelor’s program begins</td>
</tr>
<tr>
<td>15 January 2018</td>
<td>Enrollment deadline for the selection program via Studielink</td>
</tr>
<tr>
<td>Between 15 January and 15 April 2018</td>
<td>Participation in selection process. Check the programs for specific dates.</td>
</tr>
<tr>
<td>15 April 2018</td>
<td>Announcement of ranking numbers via Studielink</td>
</tr>
<tr>
<td>From 15 April 2018</td>
<td>Offer of places</td>
</tr>
<tr>
<td>Within two weeks of notification</td>
<td>Accept/reject place for selection Bachelor’s program</td>
</tr>
</tbody>
</table>

You can enroll from 1 October 2017. Please note that the enrollment deadline is 15 January, which is a few months before the date (1 May) for non-selection Bachelor’s programs.

Make sure you apply for your DigiD in good time because you will need this to be able to enroll via Studielink. You can apply for your DigiD via [www.digid.nl](http://www.digid.nl)

The selection procedure period lasts from 15 January to 15 April during which you must ensure that you submit your grades and participate in the selection per study program. Each study program has a number of important dates of its own, so check the study program of your choice.

On 15 April your ranking number will be announced via Studielink. If this falls within the maximum number, you will be offered a place.

At the moment you are offered a place, you have 14 days to accept the offer. If you fail to do this within the allotted time, then you place lapses and next in line is offered this place. Places may be offered through till the end of August. If you are close to this ranking number, then make sure you keep an extra check on your mailbox!
What selection criteria are there?

There are two criteria for the selection process:

a. school grades: at TU/e the average of all your 5 high-school (vwo) grades (or equivalent);

b. another, TU/e determined criterion not based on school grades.

Combining these two types of criterion enhances the chance that the right student finds the right place.

TU/e selection programs all use the average high-school grade as one criterion. This is the average of all your subjects at the end of that school year. If you have not completed this high-school program, other requirements apply (in this case, contact 040 247 47 47 or studeren@tue.nl).

The second criterion is determined differently per program. Check the Bachelor’s program of your choice to find out the details of the second criterion.

Both criteria contribute to the ranking number.

Can you prepare?

In general, you can prepare by taking a closer look at the study program: does it fit what you are looking for? And by exploring the procedure, dates, etc. per study program, you won’t encounter any surprises.

Whether you can or need to doing anything beforehand differs per Bachelor’s program. Check the program of your choice for study-specific details.

What is the result of participating in the selection?

If you participate in the selection procedure, you will be assigned a ranking number on the basis of the two criteria. The student with the highest scores is assigned ranking number 1, the next highest score 2, etc., just as many numbers as there are enrollments.

On 15 April you receive e-mail notification of your ranking number via Studielink. If your ranking number falls within the capacity of the study program (so within the number of available places), then you will receive another e-mail from Studielink in which you are offered a place for the study program. You can accept or reject this offer via Studielink but must do so within 14 days of receiving the notification.

Please note: accepting a place does not mean that you are eligible for admission to all TU/e Bachelor’s programs. Check the admission requirements table in advance to see whether you are eligible.
Is there still the possibility of being accepted without receiving a place?

Experience teaches that not every student that is placed actually accepts that place, so there may still be the possibility that a place becomes free, in which case this is offered to the next highest ranking number. For example, if you have ranking number 101 and there are only 100 places available, you will not be placed unless, for instance, number 54 does not accept the place and thereby a place becomes free. Since you have ranking number 101, you will be approached to take up that free place. You will receive notification from Studielink. You must accept this place within two weeks of receiving notification.

It makes sense, of course, to consider your study options so that you have a plan B at your disposal if no place is available for you. The enrollment deadline for other study programs is 1 May.

Are you a resident outside the Netherlands?

If you wish to follow one of the four study programs at TU/e from a country other than the Netherlands, the same procedure and criteria apply. In addition, the other normal entrance requirements apply. Check www.tue.nl/admission-and-enrollment. And be even more aware of the enrollment period!

Any more/other questions concerning selection?

For more details about the TU/e selection procedure, download the centralized selection regulations.
