Program information

Morning program

09:30 - 10:20 Workshop 1 - Daniel Lakens, TU/e
10:30 - 11:20 Workshop 2 - Margreet Bouma and Cas Maessen, NWO
11:30 - 12:30 Workshop 3 - Nicola Stead, PlosOne

12:30 - 13:30 Lunch and Exhibition

Afternoon program

13:30 - 13:45 Welcome by TU/e Rector Hans van Duijn
13:45 - 14:45 Lectures and discussion, part 1
14:45 - 15:00 Break
15:00 - 16:00 Lectures and discussion, part 2

16:00 - 17:00 Drinks
09.30 - 10.20: Workshop 1

TU/e: Easily sharing data and materials for a robust and cumulative science

Dr. Daniel Lakens, assistant professor Industrial Engineering & Innovation Sciences TU/e

Daniël Lakens is Assistant Professor at the Human Technology Interaction group of the Eindhoven University of Technology. He believes science is a collaborative enterprise and works on improving reward structures in science to facilitate data sharing, improving the robustness of science through replication studies, and stimulating pre-registered study designs that combat publication bias. He signed the Agenda for Open Research, and will make open practices a pre-condition for performing peer review starting January 2016. In his talk, Daniël Lakens discusses aspects that hinder the open-minded attitude of scientists in the modern scientific field. He shows possible solutions from psychological science and illustrates how these can improve the robustness and efficiency of science. He will illustrate how researchers can easily incorporate Open Science practices and share stimuli, data, and other information relevant for fellow scientists through the Open Science Framework.

10.30 - 11.20: Workshop 2

NWO: Explanation of the Open Access policy for publications and research data management.

Drs. Margreet Bouma, sr policy adviser Open Access NWO & Dr. Cas Maessen, coordinator Granting NWO

Margreet Bouma is policy adviser Open Access NWO. NWO believes that research results obtained from research funded with public money must be freely accessible. To encourage this, NWO will revise the rules for the publication of research results: publications that emerge from NWO research must in future be immediately (from publication date onwards and therefore without an embargo period) publicly accessible.

Cas Maessen is coordinator Granting NWO. Responsible data management is part of good research. To make the data that emerges from NWO-funded research as accessible and reusable as possible, NWO started a pilot Data Management on 1 January 2015.

11.20 - 12.30: Workshop 3

PLOS ONE: How and why publish Open Access

Nicola Stead, PhD, Associate Editor PLOSone

Nicola Stead is an Associate Editor at PLOS ONE, an online Open Access journal, which publishes research that is judged to be technically sound, irrespective of its perceived impact. She personally believes that research output funded by the public should be freely available and accessible to everyone and supports the Open Access movement in her role at PLOS. In her talk, Nicola Stead will provide some background to the Open Access movement in scientific publishing as well as introduce the PLOS ONE model. She will discuss some of the practicalities of submitting to PLOS ONE including information about our data sharing policy, as well outlining some of the benefits for researchers when choosing to make their work open.
Speakers afternoon program

Prof. dr. Jos Engelen (chair NWO)
Prof. dr. ir. Anthonie Meijers (University Professor TU/e)
Max Haring (Springer)
Marijtje Jongsma, PhD (chair VAWO, Dutch union of academics, vakbond voor de wetenschap)
Nicola Stead, PhD (PLOSone)
Sijbolt Noorda (Policy advisor on Open Access at the Dutch Ministry of Education, Culture and Science)

Video registration

Afterwards you can watch the complete program in multiple videos at our TU/e Library YouTube channel: https://www.youtube.com/user/tuelibrary.
The videos will be available after one week.

Exhibition participants

101 Innovations in Scholarly Communication
3TU.Datacentrum
DANS
Elsevier
IEEE
IOP
Quality Open Access Market (QOAM)
SAGE
Springer
Taylor & Francis Group
Thieme
Wiley
Information Expertise Center

The Information Expertise Center (IEC) provides both library and archive services for the TU/e community and beyond.

For all your questions about Open Access:
